Yeah, you get 30 watts out and even 20 of those watts might be  
on the desired transmit frequency!

To: info-hams@ucsd.edu

Can anyone tell me the prices being asked (or reasonable offers) for  
HF XCVRs such as KENWOOD 430's, 440's.

Is an out of town purchase for a used rig risky? ie. Can you return  
a purchase ... is there any satisfaction guarantee ... restocking fee?

Any suggestions for what to look for in an used 2 MTR rig that would be  
suitable for packet? Not worried about hi-power ... or DX packet. I  
have a 10 year old ICOM 2AT ... but it just doesn't seem like a good  
choice to put into packet service.

If there is an FAQ posted somewhere for FTP that covers some of these  
questions please let me know. This node has not been up long enough to  
capture a good history of FAQ listings.

I need to know Percentage of Technician-class licenses!

Or a rough estimate of those who are active only on VHF  
and above!

Also:

Are there survey data showing how many hams prefer a given  
HF band?

Regards,  
Ron

Subject: Smithsonian Station?  
To: info-hams@ucsd.edu

I will be in Washington this coming weekend and was wondering if anyone  
had information about an active amateur radio station in the Smithsonian.  
If I remember correctly, someone mentioned that there is one in the basement?  
When does it operate?
